

LET'S HELP OUR
PLANET!

Look at this apple! Use your imagination! Does the apple remind the Earth?

And now look!

I cut the apple into 4 parts. 3 parts of the Earth's surface is a water. And only 1 part is a land.

water

water

water

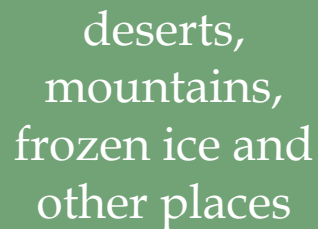

land

Now I take the part representing land and cut it in half.

Look! Only half of the land is habitable. The
rest part is deserts, mountains, frozen ice and
other places where people can't live.

deserts,
mountains,
frozen ice and
other places

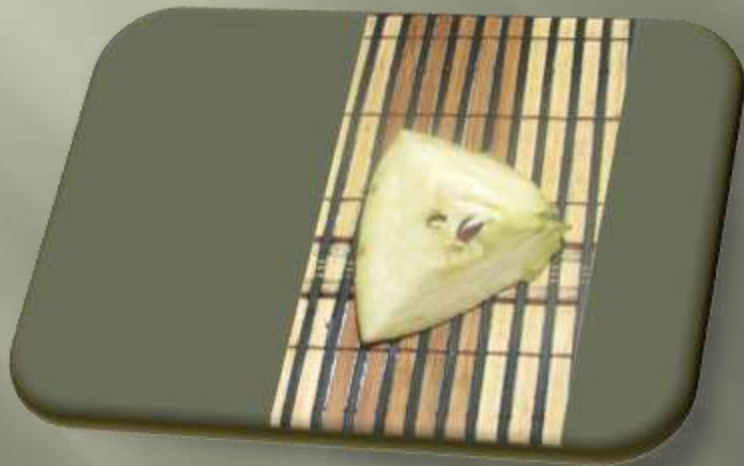

the part
representing
land

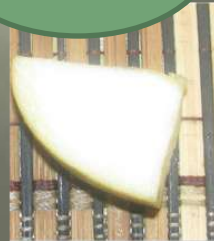

Now I cut the piece representing the habitable land into 4 sections.

Only 1 of these parts is where FOOD comes from. The other 3 parts on the Earth represent the WATER. Less than 1% of the Earth's water is fresh and drinkable.

water

So, you see how important to think about the planet we live on. And today let's speak about the Earth's problems and try to find some solutions for helping it.

“If you don’t think
about the
future, you won’t
have it”.

J. Galsworthy

Our planet is the
place we live
on, and our
future depends
on how we can
keep it.

Air pollution.

Acid rains.

Water pollution.

Land pollution.

The depletion of the ozone layer.

Disappearing animals.

The most polluted countries in the world.

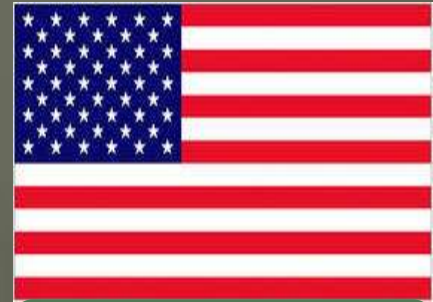

Russia

India

Philippines

USA

Chine

Rumania

You see now days our planet has many problems.

We mustn't forget that the Earth
is our home! We must protect it!

Protect our planet!

Let's sort garbage!

Trash bins

Recycling

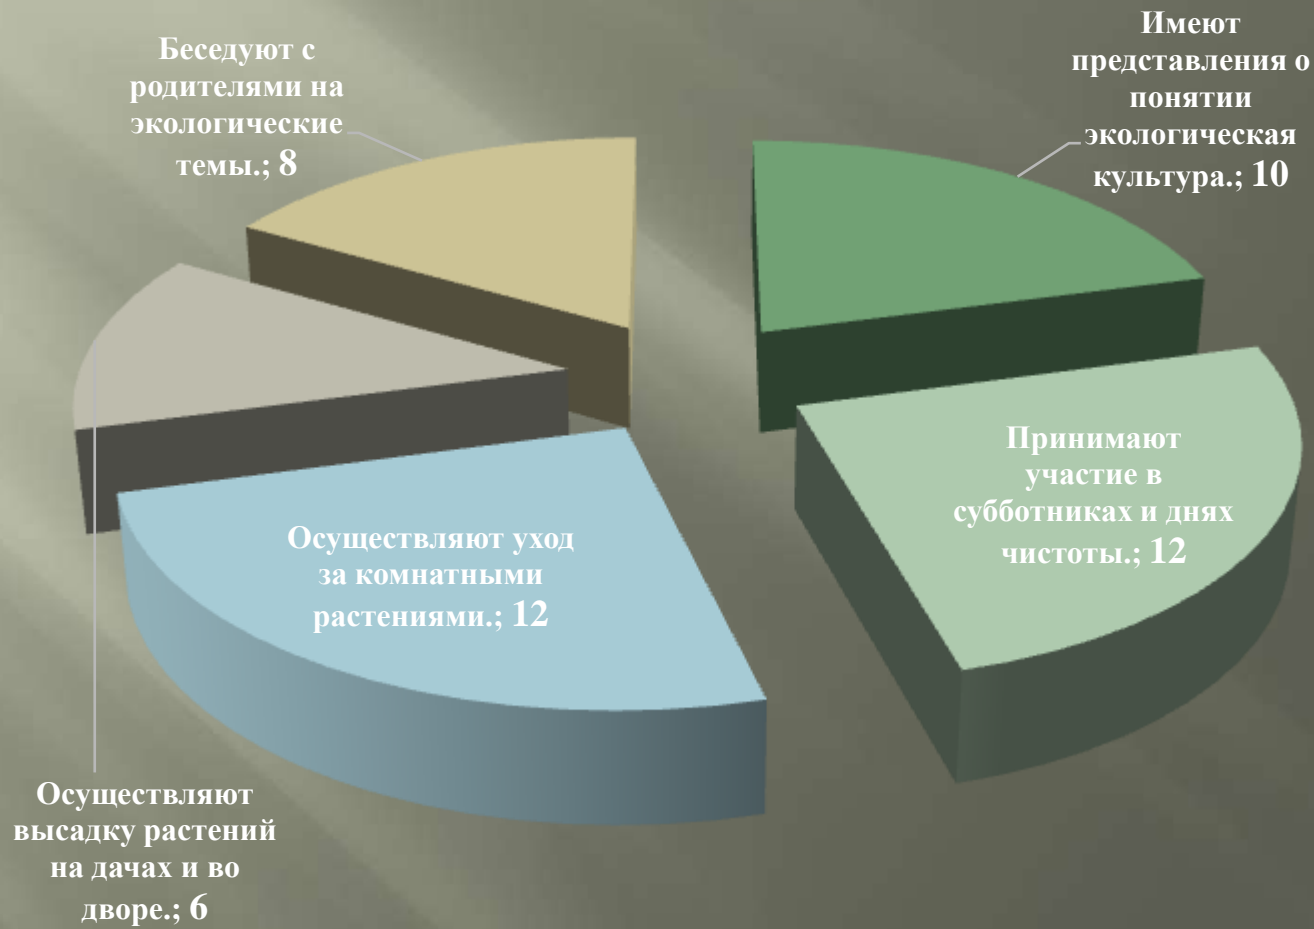

- ▣ goods made from recycled raw

- ▣ Product is suitable for processing

Analysis of the survey of my classmates.

Let's take care of our planet
the Earth for themselves and
for our
next Generation

Thank You!

Save

life

on

the

Earth!
