All About Chimps

by Alex Gomez

Chimps

This is a chimp.
Chimps have dark hair.
They have big ears
and big hands.

Most chimps live
in the forest.
They spend a lot of time
in trees.

Chimps have long arms.
Their arms are very strong.
Chimps can swing
from tree to tree.

This is a chimp's foot.
Look at the big toe!
It helps the chimp
climb trees.

What Chimps Do

Chimps live in groups.

They make sounds to talk to each other.

Chimps help each other find food.

Chimps clean each other's hair with their fingers. This chimp looks for bugs and dirt.

If he finds a bug, he eats it!

What Chimps Eat

Chimps eat fruit,
leaves, flowers,
and seeds.
They also
eat eggs
and bugs.

Some chimps work as
a team to find their food.
They share the food
they find.

Chimps use tools.

This chimp uses a stick
to catch bugs.

The chimp pokes the stick
into a hole.

Bugs crawl up the stick.
The chimp pulls the stick
out and eats the bugs.

How Chimps Live

Chimps sleep in the trees.
They make nests from
branches and leaves.
Some chimps make
a new nest every night.

This is a baby chimp.
She is with her mother.

The baby chimp rides on
her mother's back.

Most chimp mothers have
one baby at a time.
But this chimp mother
had twins!
