Dolphins and humans are similar in one way: both make plans to get something they want. In the seas of southern Brazil, for example, dolphins use an interesting strategy to get food. When fish are near a boat, dolphins signal to the fishermen to put their nets in the water. Using this method, the men can catch a lot of fish. Dolphins are also social animals. They live in groups called pods, and they often join others from different pods to play games and have fun.
