

## Алгоритм нахождения суммы или разности целых чисел

### Примеры

$$-7 + 9 = +(9-7) = 2$$

$$7 + (-9) = -(9-7) = -2$$

$$-7 + (-9) = -(7+9) = -16$$

$$7 + 9 = 16$$

$$-7 - 9 = -7 + (-9) = -(7+9) = -16$$

$$-7 - (-9) = -7 + (+9) = +(9-7) = 2$$

$$7 - 9 = 7 + (-9) = -(9-7) = -2$$

$$7 - (-9) = 7 + (+9) = 16$$
