2022

PLAN

-  Foundation
-  Layout
-  Walls
-  Roof
-  Ceiling
-  Floors
-  Stairs
-  Doors
-  Windows

FOUNDATION

The **foundation** of the house will be reinforced concrete because it is standard. Since the house will be small, I will make shallow piles.

LAYOUT

My house will be **located** in a cottage village, as it is safe and has its own atmosphere of **richness**.

What are the **walls** of the house?

The walls will be erected using a **3D printer**, as it is **modern** and looks interesting. Decorations will be hung on top of these walls.

The roof of my house will be rolled up so that during the rain all the water drains down behind the house into the pond. Also, the pitched roof will be decorated with various types of plants.

ROOF

Ceiling

I want the **ceiling** of the house to be made of dark **oak**, it looks rich and beautiful. There will also be a huge beautiful chandelier hanging on the **ceiling**. There will be RGB tape around the **perimeter of the entire ceiling**

FLOOR

The floor of the house will be made of a poured floor, this will save **money relatively**, and it looks no worse than a ceramic floor. In the bedroom and living room, the **floor** will be made of **laminate**.

STAIRS

Instead of **stairs** in the house I will use an elevator, it is less energy-consuming and steeper. The only **staircase** in the house is the entrance and the **basement**.

DOORS

The **doors** will be glass or there will be arches. The **bathrooms** and **bedrooms** will have blind oak doors

WINDOWS

The **windows** will be from floor to ceiling because it is beautiful, modern and **practical** as there is a lot of **living light**.

Thank
you
