Hi Bill, how are you? I've found a couple of interesting photos for our project «Shopping» and I'd like to tell you about them.

In these pictures you can see people doing the shopping. In the first picture there is a family in a supermarket. They've got a big shopping basket full of groceries in front of them. The second photo depicts a young woman who is typing on the laptop and holding a bank card. Apparently, she is buying something online. These photos would be perfect for our project because they show two different kinds of shopping.

Obviously, there are some differences between the pictures. In the first picture the family is shopping in a supermarket, while in the second picture the woman is shopping online. Another difference is that the first picture shows the family buying groceries together, discussing what they need to purchase whereas in the second picture the woman is making her choice on her own.

Despite their differences, both of these types of shopping have their advantages. When you go to a regular shop, you can spend quality time with your family while going around the supermarket shopping for groceries. In case of online shopping, one of its advantages is that you don't have to carry heavy bags home as you can get your groceries delivered home.

Now I will discuss the disadvantages of the two types of shopping. Offline shopping can be quite time-consuming as you have to spend time on the way to the shop and back home. While shopping online, if you are not careful enough your credit card details might be stolen and you can lose your money.

Personally, I prefer online shopping because it is fast and convenient. Even if there is a problem with my purchase, it is very easy to take it back.

That's all from me now. Please, get in touch with me and tell me what you think about these photos.
